

George Kirakosyan, Frontend Developer

About

I am a Frontend Developer with nearly 4 years of experience building high-performance, scalable, and user-centric web applications. Over the course of my career, I have specialized in translating complex business logic into robust, clean, and maintainable code.

My core expertise lies in the Vue.js ecosystem (Vue 2/3, Nuxt), backed by a solid foundation in HTML, CSS (SCSS), JavaScript, and TypeScript. I thrive in collaborative, cross-functional agile teams, where I actively contribute to project scoping, sprint planning, and maintaining high engineering standards.
